

WEB & CLOUD

Our technology is 100% web, over 15 years' experience in transactional environments has given us a stable platform making us pioneers in logistics and in the transport industry. Our platform can be installed at the client's home, or can be used in "Cloud Computing."

(P) INTERNATIONAL

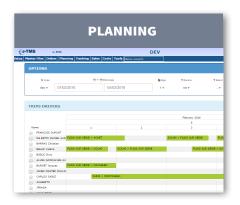

Our company is international and our internationalisation is closely linked to the internationalisation of our customers. Our solution is multi-language and you can work online in multiple languages on the same application as a user, a customer or a supplier or any other person in the logistics environment.

SCS: STANDARD COLLABORATIVE SOFTWARE

We offer our customers the possibility of working with us in the evolution of the product. This is possible by working in a close relationship with the IT departments. It also allows users to work and customise the software within their own company. Therefor if our clients wish to, they can develop, personalise and make the application grow without having to rely on us.
